Outline

1 Button

2 Navigation

```
1 <Button
2     android:id="@+id/loginButton"
3     android:layout_width="wrap_content"
4     android:layout_height="wrap_content"
5     android:layout_marginTop="50dp"
6     android:text="Login"
7     app:layout_constraintEnd_toEndOf="parent"
8     app:layout_constraintStart_toStartOf="parent"
9     app:layout_constraintTop_toBottomOf="@+id/passwordEditText" />
```

Button event handler

```
1  @Override
2  protected void onCreate(Bundle savedInstanceState) {
3      super.onCreate(savedInstanceState);
4      setContentView(R.layout.activity_main);
5
6      usernameEditText = (EditText) findViewById(R.id.
usernameEditText);
7      passwordEditText = (EditText) findViewById(R.id.
passwordEditText);
8      loginButton = (Button) findViewById(R.id.loginButton);
9      loginButton.setOnClickListener(new View.OnClickListener() {
10         @Override
11         public void onClick(View v) {
12             String username = usernameEditText.getText().toString
();
13             String password = passwordEditText.getText().toString
();
14             if(username.compareTo(validUsername) == 0 && password.
compareTo(validPassword)==0){
15                 Toast.makeText(getApplicationContext(),username +
"login successfully", Toast.LENGTH_LONG).show();
16                 startHomeActivity(username);
17             }else{
18                 Toast.makeText(getApplicationContext(),username +
"login failed", Toast.LENGTH_LONG).show();
19             }
20         }
21     });
22 }
